# LIGHTS OUT DC

## 2014 Report

A program of City Wildlife  
15 Oglethorpe St. NW  
Washington, DC 20011  
T: 202 882 1000

# INTRODUCTION

Lights Out DC, an education and advocacy program modeled after similar ones in Toronto, Chicago, New York, Baltimore, San Francisco, and many other cities in the US, was launched by City Wildlife in April 2010. It aims to quantify light-caused bird/building collisions, identify especially problematic structures, and encourage building managers to take steps that mitigate the mortality of birds.

Photo: Sam Droege/USGS

Twice yearly, during spring and fall bird migrations, millions of birds fly ancient routes to distant feeding and nesting grounds, often traveling thousands of miles. Most small birds migrate at night when the air is calm. They may even be using the stars to navigate. In cities, where lights are often on all night in tall buildings and pointed skyward, migrating birds become disoriented and fly into glass. Many are killed instantly. Others are injured or become so exhausted from trying to fly through a window that they fall. On the ground, many become victims of urban predators—rats, crows, and gulls—or street sweepers.

Results from counts like Lights Out DC provide invaluable information to concerned citizens and scientists about the problem of nocturnal bird/building collisions. The

information in this report reflects the species and numbers of migratory birds killed and injured while passing through downtown DC to points north (in the spring) and south (in the fall). Comparisons of data from year to year are used to monitor changes in the distribution of these species and to measure the effects of buildings' voluntary compliance with recommendations set forth by Lights Out DC.

Lights Out programs have been shown to reduce migrating bird mortality by as much as 80 percent in some cities. What's more, they reduce light pollution, reduce factors contributing to global warming, and save participants money spent on energy costs. In the end, it's a win-win situation for people and migrating birds.

**Lights Out programs have been shown to reduce migrating bird mortality by as much as 80%**

## Media Coverage

To raise awareness of the problem of bird-window collisions, LODC has been active in the community and has been featured in local media coverage, including:

### 2014 HIGHLIGHT

- **BBC News**

Lights Out DC was thrilled to be profiled by BBC News in May 2014. Reporter Aidan Lewis participated in a morning walk, and he and producer Colm Molloy interviewed Lights Out volunteers, culminating in a feature article and video. The YouTube posting has over 6,000 views.

## Partnership With Capital City Public Charter School

Lights Out DC partnered with Capital City Public Charter School's Urban Ecology class to help raise awareness about the threats migratory birds face in urban environments. At the beginning of their ornithology unit, Lights Out volunteers visited with students and spoke with them about migration, urban threats, and Lights Out DC. Following the presentation, students participated in the Lights Out walks during the spring, picked a research project using Lights Out data from previous years, and presented it to Lights Out volunteers at the end of their unit.

Students from Capital City Charter School record data for a Common Yellowthroat found on a Lights Out walk.

## Birds Found

Table 1 includes all 61 species of birds found by Lights Out DC volunteers in 2014. (This does not include birds that were unable to be identified.) A total of 414 individual birds were picked up. For more detailed information, please see the attached data table "Lights Out DC 2014 Bird Inventory," Table 3.

## Locations Where Birds Were Found

Dead, injured or exhausted birds were found at 107 locations. They are listed in Table 2 along with the number of birds found at each. For more detailed information, please see the attached data table "Lights Out DC 2014 Locations Found."

American Woodcock, *Scolopax minor*, also known as the Timberdoodle. Lights Out DC found 23 in 2014.

## SPECIES FOUND

<b>Common Name</b>	<b>Species</b>	<b>Count</b>
White-throated Sparrow	<i>Zonotrichia albicollis</i>	64
Common Yellowthroat	<i>Geothlypis trichas</i>	58
Ovenbird*	<i>Seiurus aurocapilla</i>	43
Song Sparrow	<i>Melospiza melodia</i>	28
American Woodcock*	<i>Scolopax minor</i>	23
Gray Catbird	<i>Dumetella carolinensis</i>	18
House Sparrow	<i>Passer domesticus</i>	13
Swamp Sparrow	<i>Melospiza georgiana</i>	13
Hermit Thrush	<i>Catharus guttatus</i>	12
Yellow-bellied Sapsucker	<i>Sphyrapicus varius</i>	11
Dark-eyed Junco	<i>Junco hyemalis</i>	10
Wood Thrush*	<i>Hylocichla mustelina</i>	8
Sparrow sp.		7
Black-Throated Blue Warbler	<i>Setophaga caerulescens</i>	5
Golden-crowned Kinglet	<i>Regulus satrapa</i>	5
Swainson's Thrush	<i>Catharus ustulatus</i>	5
American Robin	<i>Turdus migratorius</i>	4
Mourning Dove	<i>Zenaida macroura</i>	4
Ruby-throated Hummingbird	<i>Archilochus colubris</i>	4
Tennessee Warbler	<i>Oreothlypis peregrina</i>	4
Chipping Sparrow	<i>Spizella passerina</i>	3
European Starling	<i>Sturnus vulgaris</i>	3
Field Sparrow*	<i>Spizella pusilla</i>	3
Fox Sparrow	<i>Passerella iliaca</i>	3
Lincoln's Sparrow	<i>Melospiza lincolnii</i>	3
Northern Flicker	<i>Colaptes auratus</i>	3
Northern Waterthrush	<i>Parkesia noveboracensis</i>	3
Rock Pigeon	<i>Columba livia</i>	3
Blackpoll Warbler	<i>Setophaga striata</i>	2
Brown Creeper*	<i>Certhia americana</i>	2
Brown Thrasher*	<i>Toxostoma rufum</i>	2
Common Grackle	<i>Quiscalus quiscula</i>	2
Eastern Towhee*	<i>Pipilo erythrophthalmus</i>	2

<b>Common Name</b>	<b>Species</b>	<b>Count</b>
Indigo Bunting	<i>Passerina cyanea</i>	2
Magnolia warbler	<i>Setophaga magnolia</i>	2
Red-bellied Woodpecker	<i>Melanerpes carolinus</i>	2
Scarlet Tanager*	<i>Piranga olivacea</i>	2
Unidentified sp.		2
Warbler sp.		2
White-breasted Nuthatch	<i>Sitta carolinensis</i>	2
Yellow-Rumped warbler	<i>Setophaga coronata</i>	2
American Goldfinch	<i>Spinus tristis</i>	1
American Redstart	<i>Setophaga ruticilla</i>	1
Bay-breasted Warbler	<i>Setophaga castanea</i>	1
Belted Kingfisher	<i>Megaceryle alcyon</i>	1
Blue Jay	<i>Cyanocitta cristata</i>	1
Brown-headed Cowbird	<i>Molothrus ater</i>	1
Cape May Warbler	<i>Setophaga tigrina</i>	1
Northern Cardinal	<i>Cardinalis cardinalis</i>	1
Cooper's Hawk	<i>Accipiter cooperii</i>	1
Downy Woodpecker	<i>Picoides pubescens</i>	1
Grasshopper Sparrow*	<i>Ammodramus savannarum</i>	1
House Finch	<i>Haemorhous mexicanus</i>	1
Louisiana Waterthrush*	<i>Parkesia motacilla</i>	1
Mourning Warbler	<i>Geothlypis philadelphia</i>	1
Northern Parula	<i>Setophaga americana</i>	1
Orange-crowned Warbler	<i>Oreothlypis celata</i>	1
Palm Warbler	<i>Setophaga palmarum</i>	1
Red-eyed Vireo	<i>Vireo olivaceus</i>	1
Ruby-crowned Kinglet	<i>Regulus calendula</i>	1
Thrush sp.		1
Tufted Titmouse	<i>Baeolophus bicolor</i>	1
Veery	<i>Catharus fuscescens</i>	1
Woodpecker sp.		1
Worm-eating Warbler*	<i>Helmitheros vermivorum</i>	1

**Total Identified Species**

**6** 400-444 N. Capitol St. NW

**7** 601 New Jersey Ave. NW

## METHOD

Unless extreme weather precluded it, a group of Lights Out DC volunteers met at 5:30 a.m. every morning throughout the months of April, May, September, October and into November 2014 to walk—or in some cases, drive or bicycle—prescribed routes and search for dead and injured migratory birds.

Routes were intentionally arranged so as to include buildings with architectural features thought to be particularly problematic: tall glass atria, large expanses of reflective glass, overhead glass walkways, etc. The purposes of monitoring are to determine the extent of the problem in DC, to identify problem buildings, and to generate data that will change behavior.

As in previous years, the primary route began at Union Station and extended to 10th Street, NW; it was covered six to seven days per week. Volunteers on this route generally also checked the Hart Senate Office Building for birds.

Due to concerns that street cleaners were consistently washing down sidewalks before our volunteers could fully examine the Foggy Bottom route, Lights Out DC replaced the Foggy Bottom route with a route through Chinatown in 2014. The new Chinatown route incorporates some buildings that had been part of the Union Station route, such as 901 New York Ave., NW. It also incorporates some of the new construction in Chinatown, such as 901 G St., NW, 901 Massachusetts Ave, NW (Marriott Marquis Hotel) and City Center DC, which includes three blocks

of new glass buildings. Furthermore, glass buildings, such as 655 K St., NW, continue to be built along the Massachusetts Avenue corridor near the Convention Center, and the Union Station route has been expanded to include these new structures.

Some volunteers covered extra buildings before the 5:30 a.m. meet-up time. Others monitored buildings where they work, and individual birds were reported and delivered to the Lights Out DC group and to City Wildlife's Wildlife Rehabilitation Center by people who were not regular volunteers. All of these birds are included in the inventory.

**Volunteers met at 5:30 a.m. every morning throughout the months of April, May, September, October and into November**

Birds found by Lights Out DC. Clockwise from top: Blue Jay, three Black-Throated Blue Warblers, Belted Kingfisher, Indigo Bunting.

Various species of sparrow found in 2014 by Lights Out DC.  
Photo: Sam Droege/USGS

Dead birds were collected in plastic bags. The date, location found, and species were written on the bag. The specimens were frozen and later given to the Smithsonian Institute's National Museum of Natural History. Of the 414 total birds found in 2014, 58 were injured or stunned, but recovered sufficiently that they could be released later that day by Lights Out DC volunteers.

Recommendations for collecting dead birds and handling adult injured birds were obtained from Toronto's FLAP (Fatal Light Awareness Program), Lights Out Baltimore!, and the New York City Audubon Society. Our work was permitted by the U.S. Fish and Wildlife Service under a special purpose-salvage permit, number MB00680A-0.

## CONCLUSIONS

- 1** The fifth year of Lights Out DC data continues to demonstrate that a significant number of fatal and injurious bird/building collisions occur during the night in downtown Washington, DC, during times of bird migrations.
- 2** Citizen science programs like Lights Out DC are an indispensable part of new and ongoing research on bird-window collisions. Lights Out DC's data was and will continue to be utilized by scientists researching the problem, contributing to a deepening understanding of the issue. We are following to the extent possible the best practices recommendations for data collection that *Scott Loss, et al.*, formulated based on examining LODC's data and that of similar Lights Out organizations.
- 3** Initial interest in Lights Out DC from building management and BIDs was strong, but follow-through was limited. Lights Out DC will continue directing outreach efforts at building management and BIDs, suggesting other methods to reduce bird kills, since lighting may not be the only problem in every building: other problems include transparent glass or highly reflective, mirrored glass. For example, although the Architect of the Capitol continues to dim the lights in the atrium of the Thurgood Marshall Federal Judiciary Center during migrations periods, Lights Out DC volunteers found a total of 48 birds at that location. Some are striking the glass atrium after the lights are turned on at 6:00 a.m. or even after sunrise.

**4** Approximately 61 species of birds were collected. The majority of these species are migratory birds, and the majority of them are neo-tropical migrants. Populations of many of these birds continue to decline each year for a number of reasons, including bird/glass collisions in cities along their migratory routes.

In 2014 our organization found 11 species of birds that are listed in the District of Columbia's Wildlife Action Plan as "species of greatest conservation need"—American Woodcock, Brown Creeper, Brown Thrasher, Eastern Towhee, Field Sparrow, Grasshopper Sparrow, Louisiana Waterthrush, Ovenbird, Scarlet Tanager, Wood Thrush, and Worm-Eating Warbler.

**5** Only a small portion of the District of Columbia's downtown area was covered by Lights Out DC volunteers. Volunteers documented that birds are being killed by collisions with glass in the Chinatown area as well as near the National Mall. However, volunteers did not monitor every day of the migration period. Additionally, volunteers frequently find birds on their second pass of a building on the same morning, at times witnessing the collisions as they occur, indicating that there is an element of chance in recovering the birds. The resulting

data is, then, but a sampling. Nonetheless, it indicates that bird-building collisions are a significant problem in the city and pose a considerable threat to the continued survival of some species of birds whose numbers are in serious decline. Buildings around the Mall and Capitol appear to be particularly problematic due to the combination of water, planes of grass, and dense tree cover that attract birds seeking refuge after a night of flight.

**61 species of birds were collected; 11 of those are listed as species of greatest conservation need in the District of Columbia**

White-throated Sparrow, *Zonotrichia albicollis*, that died in downtown Washington, D.C. from striking a building at night. Lights Out DC found 64 in 2014.

# ACKNOWLEDGEMENTS

The Lights Out DC program would not exist without the help of our volunteers:

Alice Sturm, Vanessa Emerson, Jim Espinoza, Steve Ellington, Kristen Garcia, Bob Hoffman, Alicia and Raymond King, Anya Kramer, Christine Lemeiux, Anne Lewis, Letty Limbach, Lee Lockwood, Nick Lund, Ginny May, Jim Monsma, Lee Lockwood, Libby Sander, Lela Stanley, Lisbeth Strimple Fuisz, Stella Tarnay, Jim Tate, Hannah Waters, Teresa Watson, Bill Yeaman, Heather Horsley, Bruce Guggenberger, Courtney Van Sandt, Joy Satterwhite, Jennifer Azzariti, Stephanie Sickler, Katryn Bowe, Claudia Phelps, Angie Gipson, Matt Emrich, Kevin Ebert, Jackie Ebert, Gary Ebert, Ivana Martinez, Steve Ellington, Allison Hazen, Jeffrey Roth, Liz Zipze, Emma Qian, Zheng Hao Zhu, and Kevin Bennett. Their commitment to the program and to wildlife of Washington, DC is deeply appreciated!

On staff at City Wildlife in 2014 were Kelley MacDonald, DVM; Karen Alroy, DVM MPH; and Will Sander, DVM MPH. City Wildlife also wishes to thank the Smithsonian Migratory Bird Center at the National Zoo, Brian Schmidt of the Smithsonian National Museum of Natural History, Sam Droege of the U.S. Geological Survey, Christine Sheppard and Jason Berry of the American Bird Conservancy, Lights Out, Baltimore!, the National Aquarium in Baltimore, The Architect of the Capitol, Dan Rauch at the District Department of the Environment, Alicia King of the U.S. Fish and Wildlife Service, Chris Weiss of the DC Environmental Network, Gail Edwards of the DC Building Industry Association, D.C. Chapter of the American Institute of Architects, the staff at City Wildlife, Paula Goldberg, Alicia DeMay, and Abby Hehmeyer, and Councilmember Mary Cheh, all of whom have supported and helped guide our efforts.

**Wood Thrush,**  
*Hylocichla mustelina*,  
DC's state bird—8 found in 2014.
